Lyndy Benson

Lyndy Benson brings personal experience to art depicting the frontier life of the American West. Early in his career, he worked on ranches in Arizona, Wyoming, and Texas. He mended fences, dug wells, and worked cattle. As he worked the range, he made mental notes, took photographs and, over time, made many sketches capturing the spirit of the West. Those early efforts continue serve as the inspiration for much of his art today. He gives special attention to the land, the people, the animals, and how they interact. His rich use of color captures the vibrancy of life and soul of the West.

Lyndy Benson lives with his wife in Cleburne Texas. They have three grown children. He also works as a graphic artist for a major aerospace and technology contractor.
