

MICROFRIDGE DEFROSTING AND CLEANING INSTRUCTIONS

Avoid a **\$20** fine by following these steps.

- 1** Remove everything from inside your fridge and freezer.
- 2** Unplug the microfridge unit.
- 3** Lay a towel or newspaper in the interior bottom of the fridge and freezer. Ensure the towel extends outside the front of the fridge to catch any dripping water.
- 4** Allow the fridge and freezer to defrost for **at least 24 hours** with the doors open.
- 5** Clean and wipe down the fridge, freezer, microwave, shelves and racks using warm soapy water. Remove any remaining soap residue with a damp cloth from the interior once dried. Also, wipe down the entire exterior of the microfridge and top of the microwave.
- 6** Allow the unit to dry completely with the doors open.
